

**With respect to the table employee and department created, Create a stored procedure named as CountEmployee that returns the count of total number of employee**

**in employee Table.**

```
delimiter $
```

```
create procedure CountEmployee()
```

```
begin
```

```
    select Count(emp_id) from employee;
```

```
end$
```

```
delimiter ;
```

```
call CountEmployee();
```
